SUBJECT INDEX

Aniline black
molecules (polyaniline), conformations of, 35
Anisotropic photogeneration
of defects in *trans*-polyacetylene, interchain effects, 125
Arene radical cation salt crystals
EPR study of, 67

BEDT–TTF
synthesis of bis(diselenoalkyl)tetrathiafulvalene, mixed S–Se analogs of, 161
Benzene
potassium–, –graphite intercalation compound, structure of, 109
Bis(diselenoalkyl)tetrathiafulvalene
synthesis of, mixed sulfur–selenium analogs of BEDT–TTF, 161

Carbon fibres
thermocell of, and nitric acid, performance of, 73
Cation radical salts
of tetramethoxydibenzofuran, electrical and magnetic properties of TMDBF–BF_4, –ClO_4, –AsF_6 and –PF_6, 15
Charge and conductivity
'state-diagrams' for polyaniline *versus* potential and pH, theoretical charge, 97
Chemical n-doping
of polyactylene, kinetics of, 311
Chemical reduction
of transition metal chloride–GICs with n-butyllithium, new, 383
Cobalt
$NiCl_2$–, $CoCl_2$– and $CuCl_2$–graphite intercalation compounds, magnetoresistance of second-stage, 57
Conducting polymer(s)
alloy films, polythiophene/polyvinylchloride, and their redox properties, 235
potassium-doped poly(*p*-perfluorophenylene), with non-degenerate ground states, EPR study, 209
self-doped, 151
Conducting polymeric thin film
from cathodic electropolymerization of fluorocarbon monomer, 387
Conduction properties
of polyfluoroacetylenes and copolymers, theoretical study of electronic structure and, 43
Conductivity
doping of *cis*-polyacetylene films with metal hexafluorides; ESR and ENDOR measurements, 323
in highly drawn poly(*p*-phenylene vinylene), molecular orientation and, 85
Conjugated π-systems
large linear and cyclic, Hückel theory applied to, 269
Copper
iodine doping of ethynyl–copper compounds, reinvestigation, 295
$NiCl_2$–, $CoCl_2$– and $CuCl_2$–graphite intercalation compounds, magnetoresistance of second-stage, 57
Copper halides
proton magnetic relaxation in tetrathiafulvalene (TTF) complexes of, $(TTF)_2CuCl_2$ and $(TTF)_6CuBr_4$, 229
Cupric chloride
–graphite intercalation compounds, synthesis of, by molten salt method, 1

Dopant–polymer interaction
WCl_6-doped polyacetylene, 169

Electrical conductivity
of TCNQ-2,3,7,8-tetramethoxychalcogenanthrene, structure and, 357
Electrical properties
of TCNQ–2,3,7,8-tetramethoxychalcogenanthrene complexes, structure and, 357
Electrochemical polymerization
study on polypyrrole film by, in aqueous solution, 119

© Elsevier Sequoia/Printed in The Netherlands

Electrochemical studies
of fused-pyrrole systems, 245
of polypyrrole doped with ferrocyanide anions, 259
Electronic structure
of polyfluoroacetylenes and copolymers, theoretical study of, and conduction properties, 43
Electropolymerization
conducting polymeric thin film from cathodic, of fluorocarbon monomer, 387
ENDOR measurements
doping of *cis*-polyacetylene films with metal hexafluorides, 323
EPR study
of arene radical cation salt crystals, 67
of potassium-doped poly(*p*-perfluorophenylene), conducting polymer with non-degenerate ground states, 209
ESR measurements
soping of *cis*-polyacetylene films with metal hexafluorides, 323
Ethynyl–copper compounds
iodine doping of, reinvestigation, 295

Ferrocyanide
anions, alectrochemical study of polypyrrole doped with, 259
Fluorocarbon monomer
conducting polymeric thin film from cathodic electropolymerization of, 387
Fused-pyrrole systems
electrochemical studies of, 245

Graphite intercalation compound(s)
cupric chloride–, synthesis of, by molten salt method, 1
$NiCl_2$–, $CoCl_2$– and $CuCl_2$–, magnetoresistance of second-stage, 57
$NiCl_2$–$FeCl_3$–, synthesis of, 9
potassium–benzene–, structure of, 109
transition metal chloride–, new chemical reduction of, with n-butyllithium, 383

Hückel theory
applied to large linear and cyclic conjugated π-systems, 269

Insertion
THF, in n-doped polyacetylene, 303
Interchain effects
and anisotropic photogeneration of defects in *trans*-polyacetylene, 125
Iodine-doped
bridged phthalocyaninatoiron(II) and -ruthenium(II) compounds, 347
Iodine doping
of ethynyl–copper compounds, reinvestigation, 295
Ionized impurity scattering
in quasi-one-dimensional semiconductor, 289
Iron
iodine-doped bridged phthalocyaninatoiron(II) and -ruthenium(II) compounds, 347
$NiCl_2$–$FeCl_3$–graphite intercalation compounds, synthesis of, 9
optimum reaction conditions for polymerization of pyrrole by Fe(III) chloride in aqueous solution, 365

Kinetics
of chemical n-doping of polyacetylene, 311

Magnetic properties
of TMDBF–BF_4, –ClO_4, –AsF_6 and –PF_6, cation radical salts of tetramethoxydibenzofuran, 15
Magnetoresistance
of second-stage $NiCl_2$–, $CoCl_2$– and $CuCl_2$–graphite intercalation compounds, 57
Mechanical properties
of electrochemically prepared polypyrrole film, temperature dependence of, 79
Metal hexafluorides
doping of *cis*-polyacetylene films with: conductivity, ESR and ENDOR measurements, 323
Metallic properties
design of polymers with, substituted polyperylene and poly(*p*-phenylene), 333
Molecular orientation
and conductivity in highly drawn poly(*p*-phenylene vinylene), 85

Molten salt method
synthesis of cupric chloride–graphite intercalation compounds by, 1

Nickel
$NiCl_2$–, $CoCl_2$– and $CuCl_2$–graphite intercalation compounds, magnetoresistance of second-stage, 57
$NiCl_2$–$FeCl_3$–graphite intercalation compounds, synthesis of, 9
Niobium
on properties of quasi-one-dimensional compound $NbSe_3$ doped with Ta, 379
Nitric acid
thermocell of carbon fibres and nitric acid, performance of, 73

Phase transitions
study of relationship between, and transport properties in $Zn_{0.81}[Pt(C_2O_4)_2]\cdot 6H_2O$, 215
Phthalocyaninato
iodine-doped bridged phthalocyaninatoiron(II) and -ruthenium(II) compounds, 347
Platinum
studies on one-dimensional platinum atom chain compound $Rb_3(H_3O)_{0.2}[Pt(CN)_4](O_3SO\cdot H\cdot OSO_3)_{0.5}\cdot 0.8H_2O$, 281
study of relationship between phase transitions and transport properties in $Zn_{0.81}[Pt(C_2O_4)_2]\cdot 6H_2O$, 215
Polyacetylene
trans-, interchain effects and anisotropic photogeneration of defects in, 125
kinetics of chemical n-doping, 311
THF insertion in n-doped, 303
WCl_6-doped, dopant–polymer interaction, 169
Polyacetylene films
cis-, doping of, with metal hexafluorides, conductivity, ESR and ENDOR measurements, 323
Polyaniline
conformations of aniline black molecules, 35
soluble, 141
theoretical charge and conductivity 'state-diagrams' for, *versus* potential and pH, 97
Polyfluoroacetylenes
and copolymers, theoretical study of electronic structure and conduction properties of, 43
Polymerization
of pyrrole by Fe(III) chloride in aqueous solution, optimum reaction conditions for, 365
Poly(*p*-perfluorophenylene)
EPR study of K-doped, conducing polymer with non-degenerate ground states, 209
Polyperylene
design of polymers with metallic properties, substituted, and poly(*p*-phenylene), 333
Poly(*p*-phenylene)
design of polymers with metallic properties, substituted polyperylene and, 333
Polyphenylenemethines
synthesis of, reinvestigation, 375
Poly(*p*-phenylene vinylene)
molecular orientation and conductivity in highly drawn, 85
Polypyrrole
electrochemical study of, doped with ferrocyanide anions, 259
Polypyrrole film
electrochemically prepared, temperature dependence of mechanical properties of, 79
study on, by electrochemical polymerization in aqueous solution, 119
Polythiophene/polyvinylchloride
conducting polymer alloy films and their redox properties, 235
Potassium
–benzene–graphite intercalation compound, structure of, 109
EPR study of K-doped poly(*p*-perfluorophenylene), conducting polymer with non-degenerate ground states, 209
Preparation
and properties of 1:1 complex of tetrathiafulvalene and 1,3,5-trinitrobenzene (TTF–TNB), 373
Proton magnetic relaxation
in tetrathiafulvalene (TTF) complexes of copper halides, $(TTF)_2CuCl_2$ and $(TTF)_6CuBr_4$, 229
Pyrrole
optimum reaction conditions for polymerization of, by Fe(III) chloride in aqueous solution, 365

Quasi-one-dimensional compound
$NbSe_3$ doped with Ta, on properties of, 379
Quasi-one-dimensional semiconductor
ionized impurity scattering in, 289

Redox properties
polythiophene/polyvinylchloride conducting polymer alloy films and their, 235
Rubidium
studies on one-dimensional platinum atom chain compound $Rb_3(H_3O)_{0.2}[Pt(CN)_4](O_3SO{\cdot}H{\cdot}OSO_3)_{0.5}{\cdot}0.8H_2O$, 281
Ruthenium
iodine-doped bridged phthalocyaninatoiron(II) and -ruthenium(II) compounds, 347

Selenium
on properties of quasi-one-dimensional compound $NbSe_3$ doped with Ta, 379
synthesis of bis(diselenoalkyl)tetrathiafulvalene, mixed S–Se analogs of BEDT–TTF, 161
Sulfur
synthesis of bis(diselenoalkyl)tetratialfulvalene, mixed S–Se analogs of BEDT–TTF, 161
Superlattices
synthetic metal, 185
Synthesis
of bis(diselenoalkyl)tetrathiafulvalene, mixed sulfur–selenium analogs of BEDT–TTF, 161
of cupric chloride–graphite intercalation compounds by molten salt method, 1
of $NiCl_2$–$FeCl_3$–graphite intercalation compounds, 9
of polyphenylenemethines, reinvestigation, 375
Synthetic metal superlattices, 185

Tantalum
on properties of quasi-one-dimensional compound $NbSe_3$ doped with, 379
TCNQ
–2,3,7,8-tetramethoxychalcogenanthrene complexes, structure and electrical conductivity of, 357
Temperature dependence
of mechanical properties of electrochemically prepared polypyrrole film, 79
Tetramethoxydibenzofuran
electrical and magnetic properties of TMDBF–BF_4, –ClO_4, –AsF_6 and –PF_6, cation radical salts of, 15
Tetrathiafulvalene
preparation and properties of 1:1 complex of, and 1,3,5-trinitrobenzene (TTF–TNB), 373
proton magnetic relaxation in TTF complexes of copper halides, $(TTF)_2CuCl_2$ and $(TTF)_6CuBr_4$, 229
Thermocell
of carbon fibres and nitric acid, performance of, 73
THF
insertion in n-doped polyacetylene, 303
Transition metal chloride
–GICs, new chemical reduction of, with n-butyllithium, 383
Transport properties
study of relationship between phase transitions and, in $Zn_{0.81}[Pt(C_2O_4)_2]{\cdot}6H_2O$, 215
Trinitrobenzene
preparation and properties of 1:1 complex of tetrathiafulvalene and 1,3,5-trinitrobenzene (TTF–TNB), 373
Tungsten
dopant–polymer interaction, WCl_6-doped polyacetylene, 169

Zinc
study of relationship between phase transitions and transport properties in $Zn_{0.81}[Pt(C_2O_4)_2]{\cdot}6H_2O$, 215
